

SURF AND SKI TRANSPORT

ABSTRACT

A hitch-mountable, vehicle load carrying apparatus and method is herein disclosed.

The device includes a base load-carrying platform, and a vertical support structure

5 connected to a horizontal crossbar structure that is adjustable in height. The device further includes several transverse bars that are also adjustable for secure fitting to the equipment that is to be transported. An exemplary embodiment includes wheels connected to the load-carrying platform for convenient stowage of equipment without physical removal from the device.
